SEATTLE WA 98124-3757

Permit Number: **SO3-002471**

Site Name: SWAN BAY HOLDINGS DOCK

Location: 7100 2ND AVE SW

Dear Stormwater Permittee:

The Washington State Department of Ecology (Ecology) received your application for renewal of coverage under the Stormwater Baseline General Permit for Industrial Facilities. Ecology is granting continued permit coverage under the reissued stormwater general permit. Ecology issued the updated permit on October 4, 2000 and your permit coverage under the reissued permit became effective on November 18, 2000. There were no substantive changes made to the permit. An updated permit is enclosed. You are legally obligated to comply with the permit terms and conditions. Now would be a good time to review permit requirements. You should keep this permit in a safe place where you can reference it as necessary to maintain permit compliance.

Your permit number has not changed. For your convenience, we have enclosed a permit cover sheet. This sheet includes the information we have on file for your facility. Retain this letter and the enclosed permit cover sheet with your permit. Reference the permit number any time you contact Ecology concerning your permit. If the information on the cover sheet is incorrect or needs to be updated, please notify Ecology in writing regarding any changes we need to make to our records.

Although permit conditions have not changed, we would like to mention a few of the significant permit requirements:

Stormwater Pollution Prevention Plan: You must have a current stormwater pollution prevention plan (SWPPP) for your facility on-site or readily available to the site. The SWPPP must identify and document all the existing and potential pollutant sources. It must identify the best management practices (BMPs) to minimize the exposure of stormwater to pollutants and to achieve a clean stormwater discharge. Review permit condition S9 beginning on page 13 to assure that you are complying with this permit requirement.

Best Management Practices: Best management practices (BMPs) must be in place on your site to protect stormwater from contamination and as necessary to treat the stormwater before discharge to waters of the state. Facility staff need to be trained to understand the importance of protecting stormwater from contamination and to monitor and report problems or potential problems. BMPs must be maintained in working condition and a regular review of BMPs must be conducted to determine if they are effective. If they are insufficient to protect water quality, additional BMPs must be implemented.

Site Inspection: The permittee must conduct a site inspection at least twice a year, once in the wet season during a storm event and once in the dry season when there is no discharge of stormwater. You must document the inspection and place a copy of the report with the stormwater pollution prevention plan. Review permit condition S9 beginning on page 17 for additional information.

Permit Termination: The permittee must submit a notice of termination (NOT) to Ecology if the facility is sold or ceases to operate. Unless Ecology receives a termination notice, the permit remains active and the permittee of record is responsible for permit compliance and permit fees continue.

Ecology has a number of ways for you to receive assistance with understanding and complying with permit requirements.

On the Internet: Ecology maintains a stormwater webpage. Information may be found under the "Permit" and "Technical Information" categories and associated links. Use the internet address below (URL) to access Ecology's information from the Internet:

<http://www.ecy.wa.gov/programs/wq/stormwater/>

Ecology Headquarters: You can contact Linda Matlock by telephone at (360) 407-6437 or by email at lmak461@ecy.wa.gov.

Ecology Regional Office: You can request assistance from the Ecology staff person located in the regional office that serves your area. Regional staff can also conduct a technical assistance visit to your site as time permits. Regional contacts are listed below with a telephone number and email address.

Northwest Regional Office			
Ron Devitt	(425) 649-7028	rdev461@ecy.wa.gov	King County
Kevin Fitzpatrick	(425) 649-7037	kfit461@ecy.wa.gov	Island, San Juan, Skagit, and Whatcom Counties
Sean Callahan	(425) 649-7223	scal461@ecy.wa.gov	Kitsap and Snohomish Counties
Northwest Region Bellingham Office			
Mark Kaufman	(360) 738-6248	mmak461@ecy.wa.gov	Whatcom County
Southwest Regional Office			
Marilou Pivirotto	(360) 407-6273	mpiv461@ecy.wa.gov	Clallam, Clark, Cowlitz, Grays Harbor, Jefferson, Lewis, Mason, Pacific, Pierce, Skamania, Thurston, and Wahkiakum Counties
